Nightstand & lamp

How to build the room

1. Print on cardstock at 100% scale and check the 1 inch bar.
2. Cut out the back wall, side wall and floor along the gray lines. Score and fold every dashed line.
3. Glue the back wall's side tab behind the side wall's back edge to make a corner.
4. Fold the floor's tabs up and glue them inside the bottom of both walls; they become the baseboards.
5. Cut the furniture and its stands, cut the red slits and slot each stand on. Rugs simply lie on the floor.
